ABOUT

At Barklane Pets we welcome all pets regardless of their age, size, breed, or temperament. We take the time to get to know each guest, we are especially mindful of timid, fearful, and anxious pets and do everything we can to make them comfortable.

Our professional pet groomers are dedicated to keeping your furry friends happy and healthy. Each pet is handled by extensively trained, experienced and highly qualified groomers using the highest quality products and the latest technology. Groomers have a combination of experience and knowledge to treat each pet with the best care, love and attention.

We maintain strict practices to ensure a highly hygienic environment by using UV sterilising and disinfecting grooming equipments to eliminate the risk of transmission of bacteria, microorganisms, and viruses.

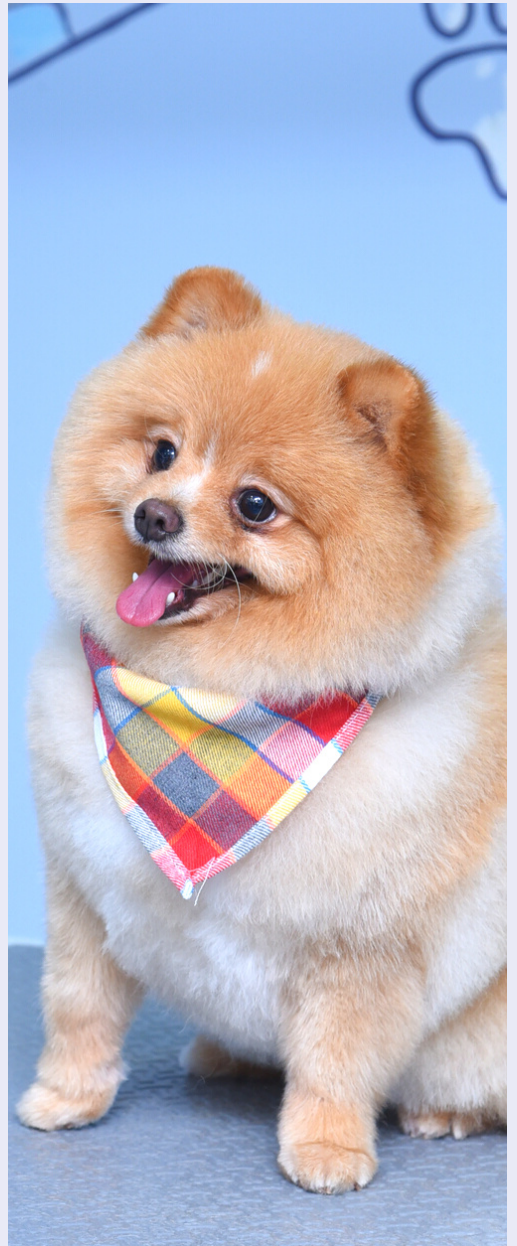

Our trained groomers are very attentive to each individual pet's needs, allow rest breaks if the pet requires it. Our main goal is to offer your pet a safe, stress-free experience.

G R M I N G

Nail Clipping

Regular nail trims not only help keep the nails short but helps reinforce healthy foot structure and posture, and reduces the risk of infection.

Nose & Palm Balm

The product protect, heal, and moisturise the pet's paws, nose and other body parts.

Great for dry or chafed elbows, sunburned noses, cracked pads, or itchy skin.

Ear Plucking

Ear cleaning requires trimming the hair that can grow inside the ear canal.

A regular groom will include maintenance of this fur to prevent overgrowth and infection.

Eye Cleaning

Prevents irritation, keep eyes clean and reduce the risk of infection.

Nail Capping

Nail cap are tiny little plastic that covers your cat's nails to minimize the damage inflicted by sharp claws. It last between 4 to 6 weeks.

G R M I N G

De-Matting

Matting is a condition in your dog's fur that is caused by dense tangles and knots.

It's a painful condition that can lead to other health concerns such as infections or skin irritations and can also mask other health issues or parasites.

Mats cut off the air flow in your dog's hair and can trap moisture, which can cause irritation and sores on your dog.

Blood supply to skin and extremities becomes blocked. Thick, clumped hair traps dirt and debris under the coat, leaving skin unable to breathe

Contributes to hot spots, sores, rashes, fungal and bacterial infections, eczema, urine and feces burns, eye and ear infections, discoloration of coat, mites, lice, fleas, ticks, maggots, and more.

In some circumstances, matting may be so severe that you would need to take your dog to a veterinarian for treatment.

Pet owners must try to maintain the pet's coat between grooming appointments!

G R M I N G

Face Trimming

Long hair may irritate their eyes or ears, causing them discomfort.

We recommend a face trim every 2 to 4 weeks to keep them comfortable and happy.

Underpaw Hair Removal

Mats of fur can grow hard and become tangled and between your pet's pads.

Imagine pebbles stuck between your toes! A groomer will keep this hair short and clean.

Hand Stripping

Hand stripping is the process of excess dead topcoat, without clipping, leaving room for the new coat to grow and giving a more natural look.

It keeps the coat tidy and healthy, leaving it strong and shiny.

Mud Masking

It can soothe irritations by removing dead irritated skin and can also soothe hot spots.

Helps in moisturising the skin and removing dandruff.

G R M I N G

Hygiene Area

Trimming or shaving the coat so it's shorter in the areas where urine or feces may otherwise stain or get stuck in the coat.

Anal Expression

Anal gland problems is scooting. Your pet will drag his butt across the ground or floor, attempting to relieve the pressure and discomfort in his glands.

Dental Brushing

Maintaining your pets teeth is extremely important, as it can prevent dental diseases and contribute to his overall quality of life.

As a groomer, we offer an oral care maintenance service to our clients to break down plaque and tartar.

Joint Massage

A proper massage has numerous health benefits: de-stresses and stimulates circulatory system.

Wash & Dry

Bathe your dog at a bare minimum once every three months, but it's safe to frequently bathe them with gentle shampoo every other week. It all depends on how active and where you take your pets!

G R M I N G

Dental Tartar Removal

How & what causes tartar?

The dark buildup on your pet's teeth that discolours and damages them.

Starting off as **plaque**, the gummy substance that forms on your canine's teeth after a meal, tartar progresses to causing the gum pain and severe dental issues.

Why is teeth cleaning important ?

Helps with bad breathe

Protects your pet from oral disease and tooth loss.

Increase the blood flow on the gums to heal wounds and stop bleeding.

A tooth brush a day, keeps the doctor away!

SEDATION FOR GROOMING

BARRI'S VETERINARY HOSPITAL

Unfortunately there are some animals that find the experience of grooming just too stressful to cope with.

In these situations it can be kinder, often a lot faster, and safer for everyone involved if the animal is sedated.

Barri's Veterinary Hospital provides sedation under veterinary care and monitoring in order for grooming to be carried out.

All of our patients undergoing sedation are strictly monitored by a veterinary nurse.
